Proper Citation: National Center for PTSD (RRID:SCR_001967)

Description: We are the center of excellence for research and education on the prevention, understanding, and treatment of PTSD. Our Center has seven divisions across the country. Although we provide no direct clinical care, our purpose is to improve the well-being and understanding of American Veterans. We conduct cutting edge research and apply resultant findings to: Advance the Science and Promote Understanding of Traumatic Stress. The National Center has emerged as the world's leading research and educational center of excellence on PTSD. Its vision is to be the foremost leader in information on PTSD and trauma; information generated internally through its extensive research program, and information synthesized from published scientific research and collective clinical experience that is efficiently disseminated to the field. The Center is organized to facilitate rapid translation of science into practice, assuring that the latest research findings inform clinical care; and translation of practice into science, assuring that questions raised by clinical challenges are addressed using rigorous experimental protocols. By drawing on the specific expertise vested at each separate division (e.g., behavioral, neuroscientific, etc.), the National Center provides a unique infrastructure within which to implement multidisciplinary initiatives regarding the etiology, pathophysiology, diagnosis and treatment of PTSD.

Abbreviations: NCPTSD

Synonyms: National Center for Posttraumatic Stress Disorder, VA National Center for PTSD

Resource Type: institution

Keywords: post-traumatic stress disorder, stress, trauma, treatment, stress-related disorder, clinical care, human, traumatic stress disorder, one mind ptsd

Funding: US Department of Veterans Affairs

Resource Name: National Center for PTSD

Resource ID: SCR_001967
