Apo and Holo structures DataBase

RRID:SCR_004800

Type: Tool

Proper Citation

Apo and Holo structures DataBase (RRID:SCR_004800)

Resource Information

URL: <http://ahdb.ee.ncku.edu.tw/>

Proper Citation: Apo and Holo structures DataBase (RRID:SCR_004800)

Description: Database of apo and holo structure pairs of proteins before and after binding. Various protein functions have been shown directly associated with conformational transitions triggered by binding other molecules. Tertiary structures determined in the unbound and bound state are usually named apo and holo structures, respectively. AH-DB is the largest database of apo-holo structure pairs and provides a sophisticated interface to search and view the collected data. It contains 746314 apo-holo pairs of 3638 proteins from 702 organisms.

Abbreviations: AH-DB

Synonyms: Apo-Holo DataBase

Resource Type: data or information resource, database

Defining Citation: [PMID:22084200](#)

Keywords: ah-db, ahdb, apo, holo, protein interaction, structural change, protein, protein structure, protein binding, bio.tools

Funding: National Science Council Taiwan NSC 99-2628-E-006-017

Availability: The community can contribute to this resource

Resource Name: Apo and Holo structures DataBase

Resource ID: SCR_004800

Alternate IDs: biotools:ah-db, nlx_143908

Alternate URLs: <https://bio.tools/ah-db>

Record Creation Time: 20220129T080226+0000

Record Last Update: 20260821T193739+0000

Ratings and Alerts

No rating or validation information has been found for Apo and Holo structures DataBase.

No alerts have been found for Apo and Holo structures DataBase.
