Proper Citation: UAF Community Engagement and Clinical Support Core (RRID:SCR_010066)

Description: Core facility that provides the following services: Biological sample processing service, Research subject private information management service. The Community Engagement and Clinical Support Core facilitates and supports community-based participatory research by drawing on local community knowledge and scientific expertise to implement and evaluate culturally valid and effective approaches to research in Alaska Native communities. The functions of the core include: * Facilitating and sustaining community/CANHR partnerships by engaging the community in all phases of the research process. * Supporting researchers in the development and implementation of linguistically and culturally appropriate research protocols. * Providing technical capacity to collect clinical measures and biological samples. * Processing all biological specimens collected in the field and maintaining a secure biological storage facility for CANHR investigators and Alaska Native participants. The CECS Core supports CANHR's central theme of community-based participatory research through strong and sustaining community partnerships with Alaska Native people.

Resource Type: access service resource, core facility, service resource

Keywords: biological sample processing, research subject private information management
