Proper Citation: BGI-RISe - Beijing Genomics Institute Rice Information System (RRID:SCR_013446)

Description: Integrated information resource for rice genomes as well as a workbench for comparative genomic analysis among cereal crops. Sequence contigs of Beijing indica and Syngenta japonica have been further assembled and anchored onto the rice chromosomes. The rice genomes have been annotated for gene content, repetitive elements, and SNPs. Sequence polymorphisms between different rice subspecies have also been identified. Designed as a basic platform for rice study, the sequenced genomes and related information is presented in systematic and graphical ways for the convenience of in-depth comparative studies. In addition to the comprehensive data of *Oryza sativa* L. ssp. indica sequenced, BGI-RIS will host carefully curated genome information of *Oryza sativa* L. ssp. japonica.

Synonyms: BGI-RIS

Resource Type: data or information resource, database

Keywords: cereal, crop, oryza sativa, rice, rice chromosome, rice genome, software

Resource Name: BGI-RISe - Beijing Genomics Institute Rice Information System

Resource ID: SCR_013446

Alternate IDs: nif-0000-02601

Record Creation Time: 20220129T080316+0000

Record Last Update: 20260821T194001+0000

Ratings and Alerts

No rating or validation information has been found for BGI-RIS - Beijing Genomics Institute Rice Information System.

No alerts have been found for BGI-RIS - Beijing Genomics Institute Rice Information System.
