Description: A repository which hosts and archives original and edited scientific papers. Scientists can post their academic manuscripts on Libre, where they can find reviewers who will formally evaluate the manuscripts. Evaluated works are posted alongside the original manuscript with reviewers' identities disclosed and the work they edit given its own DOI. Users can post additional updated versions of their work to Libre or send their papers to journals. Papers and reviews are rated by other scientists, and from these Libre creates holistic indices listing the best rated writers and reviewers.
