Proper Citation: Anndata (RRID:SCR_018209)

Description: Software tool that provides scalable way of keeping track of data and learned annotations. Initially built for Scanpy. Used as generic class for handling annotated data matrices. Stores data matrix with annotations of observations (samples, cells) and variables (features, genes), and unstructured annotations.

Synonyms: Annotated data

Resource Type: data management software, software application, software resource

Defining Citation: [PMID:29409532](#)

Keywords: Data tracking, annotated data matrix, store data matrix, annotation of observation, annotation of variable, unstructured annotation, sparse data,

Funding: German Research Foundation ;
