Description: Zeiss Crossbeam 550 (sometimes referred to as the XB 550) is dual-beam system that combines the Gemini 2 SEM with the Ion-sculptor FIB (Focused Ion Beam) for advanced materials analysis and sample preparation. XB 550 combined with the Leica EM VCT 500 is a highly specialized system designed for advanced cryogenic workflows in materials and life sciences. It enables researchers to investigate and prepare samples at ultra-low temperatures without exposing them to air or contamination.
