Proper Citation: Southampton Tumour Bank (RRID:SCR_000673)

Description: Collects and distributes human tissue for ethically approved studies to aid the study of cancer biology and other associated research. All tissue is collected with patient consent and tissue is distributed only to ethically approved studies. The purpose of the Tissue Bank is to source, organize, collect, prepare, store and distribute a diverse collection of human tissues and biological products. This valuable core resource is available to all local academics and researchers. The on-site bank allows for rapid access to a plethora of biological materials supported by an informatics system of databases acting as an inventory management system. In addition, the Tissue Bank provides a licensed facility to store surplus tissue when studies close. Tissues currently available include normal and malignant snap frozen blocks, freshly prepared spleen and lymph nodes, fresh biopsy tissues, blood products and biological fluids. Collections can be organized by bank staff or ran in parallel with current research activities and include a wide variety of cancer classifications. We currently hold over 38,000 vials. Tissue Availability: Lymphoma - solid tissue and cells - 843; Breast - solid tissue and cells - 540; Colon - solid tissue and cells - 238; Lung - solid tissue and cells - 43; Upper Gi - BIOPSY tissue - 114; Pleural fluid and cells - 14

Abbreviations: Southampton Tumour Bank

Synonyms: University of Southampton Tumour Bank, University of Southampton Tumor Bank, University of Southampton Cancer Research UK Centre Tumour Bank, Southampton Tumor Bank, Cancer Research UK Centre Tumour Bank, Cancer Research UK Center Tumor Bank

Resource Type: biomaterial supply resource, tissue bank, material resource

Keywords: cancer biology, cancer, tumor, blood product, biological fluid, tissue, spleen, lymph node, biopsy tissue, blood product, bodily fluid, blood, lymphoma, solid tissue, cell, breast, colon, lung, upper gastrointestinal, pleural fluid, gastrointestinal

Related Condition: Cancer, Tumor, Normal, Malignant
