Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on August 18, 2025. Software to classify the function and phylogeny of reads as short as 30 bp. It is flexible, which can utilize multiple data modules and downstream analysis scripts. It is fast, reading in signature lists of 5-500 million peptide signatures in 1-15 minutes, and subsequently processes genomic fragments at the rate of 6 Gbp/hr. It parallelizes without significant increase in memory requirements until I/O bound on multiple input files; parallelization works well on 64 processors.

Abbreviations: Sequedex

Resource Type: software resource

Defining Citation: [PMID:22925230](#)

Keywords: phylogenetic, function, profile, metagenomics, synthetic, dna sequence, classification, java, linux, mac os, genomic analysis, bio.tools

Availability: THIS RESOURCE IS NO LONGER IN SERVICE

Resource Name: Sequedex

Resource ID: SCR_001233

Alternate IDs: OMICS_02110, biotools:sequedex

Alternate URLs: <https://bio.tools/sequedex>

Record Creation Time: 20220129T080206+0000

Record Last Update: 20260801T190125+0000
