Proper Citation: PD-DOC (RRID:SCR_001596)

Description: THIS RESOURCE IS NO LONGER IN SERVICE, documented on December 02, 2011. Notice: This domain name expired on 10/29/11 and is pending renewal or deletion PD-DOC is a portal and a database resource, hosting a database and linking to other databases and data sets of clinical and translational data. PD-DOC functions to organize and facilitate clinical and translational research in Parkinson's disease. The PD-DOC Database contains standardized data collected by user institutions on large numbers of patients with Parkinsons disease and other parkinsonian disorders. In some cases, data is obtained at a single point in time, while in others data is collected repeatedly over time. The PD-DOC Database is composed of the Core Data Set (CDS) which consists of those variables required to be gathered for each subject whose data is entered into the PD-DOC database. In 2005, working groups of Udall Center and invited experts deliberated to establish the components of each CDS section (e.g. General Clinical, Cognitive/Behavioral, Postmortem Brain Neuropathological Findings). The PD-DOC CDS was established and designed to optimize data analyses and data mining for large numbers of subjects participating in a variety of research studies. In most cases corresponding DNA samples are available form the NINDS Human Genetic Repository (at Coriell). Much of the website is publicly available for viewing. To request access to sections of the website dealing with downloading or requesting data, requesting a consultation, or submitting data or other information you will need to register. Before registering, you should read the PD-DOC Policies. Note that PD-DOC data can be used for research purposes only. Once your registration is successfully completed you will be automatically logged into the website.

Abbreviations: PD-DOC

Synonyms: The Parkinson's Disease Data and Organizing Center (PD-DOC), Parkinson's Disease Data and Organizing Center, The Parkinson's Disease Data and Organizing Center

Resource Type: data or information resource, data repository, storage service resource, portal, database, service resource, topical portal

Keywords: data, parkinson's disease, translational research, clinical, gds-15, cowat, dna, hoehn and yahr, idiopathic pd, linst, merq, mmse, npi-q, parkinsonism, se/adl, updrs

Funding: NINDS U01NS050095

Availability: THIS RESOURCE IS NO LONGER IN SERVICE

Resource Name: PD-DOC

Resource ID: SCR_001596
