Proper Citation: aBEAT (RRID:SCR_002238)

Description: A 4D adult brain extraction and analysis toolbox with graphical user interfaces to consistently analyze 4D adult brain MR images. Single-time-point images can also be analyzed. Main functions of the software include image preprocessing, 4D brain extraction, 4D tissue segmentation, 4D brain labeling, ROI analysis. Linux operating system (64 bit) is required. A computer with 8G memory (or more) is recommended for processing many images simultaneously. The graphical user interfaces and overall framework of the software are implemented in MATLAB. The image processing functions are implemented with the combination of C/C++, MATLAB, Perl and Shell languages. Parallelization technologies are used in the software to speed up image processing.

Abbreviations: aBEAT

Synonyms: aBEAT: A Toolbox for Consistent Analysis of Longitudinal Adult Brain MRI, Adult Brain Extraction and Analysis Toolbox

Resource Type: data processing software, image analysis software, image processing software, software application, software resource, software toolkit

Defining Citation: [PMID:23577105](#)

Keywords: analyze, atlas application, magnetic resonance, segmentation, visualization, adult, mri, brain

Resource Name: aBEAT

Resource ID: SCR_002238

Alternate IDs: nlx_155840, nlx_155542

Alternate URLs: <http://www.nitrc.org/projects/abeat>

License: aBEAT license

Record Creation Time: 20220129T080212+0000

Record Last Update: 20260912T200008+0000

Ratings and Alerts

No rating or validation information has been found for aBEAT.
