Proper Citation: BioAfrica HIV Informatics in Africa (RRID:SCR_002295)

Description: The BioAfrica HIV-1 Proteomics Resource is a website that contains detailed information about the HIV-1 proteome and protease cleavage sites, as well as data-mining tools that can be used to manipulate and query protein sequence data, a BLAST tool for initiating structural analyses of HIV-1 proteins, and a proteomics tools directory. HIV Proteomics Resource contains information about each HIV-1 gene product in regard to expression, post-transcriptional / post-translational modifications, localization, functional activities, and potential interactions with viral and host macromolecules. The Proteome section contains extensive data on each of 19 HIV-1 proteins, including their functional properties, a sample analysis of HIV-1HXB2, structural models and links to other online resources. The HIV-1 Protease Cleavage Sites section provides information on the position, subtype variation and genetic evolution of Gag, Gag-Pol and Nef cleavage sites.

Synonyms: HIV Informatics in Africa

Resource Type: topical portal, portal, data or information resource

Keywords: expression, functional, gene, aids, cleavage, database, hiv, hiv/aids databases, interaction, localization, model, modification, post-transcriptional, post-translational, protease, protein, proteome, proteomic, publication, research, sequence, software, structural, journal article

Resource Name: BioAfrica HIV Informatics in Africa

Resource ID: SCR_002295

Alternate IDs: nif-0000-21050

Record Creation Time: 20220129T080212+0000

Record Last Update: 20260805T044036+0000

Ratings and Alerts

No rating or validation information has been found for BioAfrica HIV Informatics in Africa.

No alerts have been found for BioAfrica HIV Informatics in Africa.
