Proper Citation: GUDMAP Ontology (RRID:SCR\_002637)

**Description:** A high-resolution ontology has been developed by members of the GUDMAP consortium to describe the subcompartments of the developing murine genitourinary tract. This ontology incorporates what can be defined histologically and begins to encompass other structures and cell types already identified at the molecular level. The GUDMAP ontology encompasses Theiler stage (TS) 17-27 of development as well as the sexually mature adult. It has been written as a partonomic, text-based, hierarchical ontology that, for the embryological stages, has been developed as a high-resolution expansion of the existing Edinburgh Mouse Atlas Project (EMAP) ontology. It also includes group terms for well-characterized structural and/or functional units comprising several sub-structures, such as the nephron and juxtaglomerular complex. Each term has been assigned a unique identification number. Synonyms have been used to improve the success of query searching and maintain wherever possible existing EMAP terms relating to this organ system.

Abbreviations: GUDMAP Ontology

Resource Type: data or information resource, resource, controlled vocabulary, ontology

Defining Citation: PMID:17452023

**Keywords:** murine, genitourinary tract, development, in situ hybridization, theiler stage, adult mouse, newborn mouse, adolescent mouse, embryonic mouse

**Funding:** NIDDK DK070136-02; NIDDK DK070181; NIDDK DK07020001; European Union FP6 005085

Resource Name: GUDMAP Ontology

Resource ID: SCR\_002637

Alternate IDs: nlx\_156063

**Record Creation Time:** 20220129T080214+0000

Record Last Update: 20250501T080513+0000

#### **Ratings and Alerts**

No rating or validation information has been found for GUDMAP Ontology .

No alerts have been found for GUDMAP Ontology .
