Proper Citation: International Graduate Program Medical Neurosciences (RRID:SCR_002740)

Description: Program integrates basic laboratory research and the clinic in terms of faculty, students, course content and infrastructure. This university's rigorous and comprehensive Master program provides a structured education in basic neuroscience to medical students and trains students of the life sciences in medical topics and approaches concerning the central and peripheral nervous system. Besides in depth theoretical training, the MSc program emphasizes state-of-the art practical lab experience, preparing graduates for continued research as PhD students. The PhD program places a high emphasis on scientific excellence, provides a multidisciplinary research and learning environment and offers extensive supervision and tutoring allowing students to complete their projects within 3 years. The supervised research project stands in the center of the PhD program, complemented by colloquia, workshops and training in professional skills. Our PhD students are member of the undefined Humboldt-Graduate-School providing an excellent service and training in transferable skills.
