Description: Digital repository software written in C# / ASP.net for powering digital libraries in a Windows server environment. Standards-based repository keeps all files in METS/MODS packages. Several related applications are available as well and the libraries can work independently as great digital library resources. SobekCM allows users to discover online resources via semantic and full-text searches, as well as a variety of different browse mechanisms. For each digital resource in the repository there are a plethora of display options, which may be selected by an appropriately authenticated use. This repository includes online metadata editing and online submissions in support of institutional repositories.

Abbreviations: SobekCM
