Proper Citation: Allegheny College Neuroscience (RRID:SCR_003305)

Description: Allegheny's neuroscience major formalizes an alliance dating back 25 years between the College's well-known biology and psychology departments. The major brings faculty and students together to study the brain and the nervous system using principles from the natural and social sciences. It requires a common core of biology, chemistry, and psychology courses. Students may choose from two tracks: "cellular neurobiology" or "behavioral and cognitive neuroscience", and they have the opportunity to explore interdisciplinary topics through the Junior Seminar and the year-long Senior Research Project.

Synonyms: Allegheny Neuro, Allegheny College Neuroscience Program
