PANDIT : Protein and Associated Nucleotide Domains with Inferred Trees

RRID:SCR_003321

Type: Tool

Proper Citation

PANDIT : Protein and Associated Nucleotide Domains with Inferred Trees
(RRID:SCR_003321)

Resource Information

URL: <http://www.ebi.ac.uk/goldman-srv/pandit>

Proper Citation: PANDIT : Protein and Associated Nucleotide Domains with Inferred Trees (RRID:SCR_003321)

Description: PANDIT is a collection of multiple sequence alignments and phylogenetic trees covering many common protein domains. It contains: * the seed protein sequence alignments from the Pfam-A (curated families) database (version 17.0) * nucleotide sequence alignments derived from sequences available for the above and using the protein alignments as "templates"; * protein sequence alignments restricted to the family members for which nucleotide sequences are available * inferred phylogenetic trees for each alignment The data in PANDIT and the dataset's development have been frozen owing to a lack of funding support. The existing data, version 17.0 corresponding to Pfam 17.0, remain stable and, we hope, useful. The entire database is also available for download as a flatfile from this website.

Abbreviations: PANDIT

Synonyms: Protein and Associated Nucleotide Domains with Inferred Trees

Resource Type: data or information resource, database

Defining Citation: [PMID:16381879](#), [PMID:12912837](#)

Keywords: gold standard, database, protein, associated nucleotide domain

Funding: Wellcome Trust

Availability: Free, Available for download, Freely available

Resource Name: PANDIT : Protein and Associated Nucleotide Domains with Inferred Trees

Resource ID: SCR_003321

Alternate IDs: r3d100010570, nif-0000-03241

Alternate URLs: <https://doi.org/10.17616/R3GP69>
