Proper Citation: probeBase (RRID:SCR_003417)

Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on October 28, 2025. A database of probes and microbes that can be searched for target organisms, probe names, probe sequences, probe accession numbers, and references. The search target site function can assist in the development of new rRNA-targeted oligonucleotide probes for fluorescence in situ hybridization (FISH), while the match tool can be used to rapidly retrieve all published probes targeting your query sequences (e.g. from a rRNA gene clone library) without prior phylogenetic analysis. probeBase is hyperlinked with PubMed, RDP-II, and Greengenes to provide additional bibliographic information and up-to-date data on probe specificity. Ribosomal RNA (rRNA) targeted oligonucleotide probes are widely used for fluorescence in situ, dot blot, and microarray hybridization in culture-independent studies of microbial communities and for the identification of uncultured prokaryotes in clinical and environmental samples. probeBase is a comprehensive database containing published rRNA-targeted oligonucleotide probe sequences, DNA microarray layouts and associated information.

Synonyms: probeBase

Resource Type: data or information resource, database

Defining Citation: [PMID:17099228](#)

Keywords: FASEB list

Availability: THIS RESOURCE IS NO LONGER IN SERVICE

Resource Name: probeBase

Resource ID: SCR_003417

Alternate IDs: nif-0000-03340

Record Creation Time: 20220129T080218+0000

Record Last Update: 20260919T195640+0000

Ratings and Alerts

No rating or validation information has been found for probeBase.

No alerts have been found for probeBase.
