Description: Organization that designs and manufactures analytical instrumentation to measure physicochemical parameters for the pharmaceutical and biotech industry, as well as offers physicochemical data and consultancy services. Their instruments provide accurate and reliable values for pKa, log P, log D, solubility and dissolution, particle size and shape analysis. These critical physicochemical parameters are important in drug formulation, and also influence the ability of New Chemical Entities to cross biological membranes such as the gastro-intestinal tract, blood-brain barrier, skin and cell walls. Sirius also offers an analytical service for high quality PhysChem outsourcing, used by hundreds of clients worldwide.
