Proper Citation: Moffitt Cancer Center Tissue Core (RRID:SCR_004406)

Description: A central tissue repository at Moffitt specializing in protocol-driven human tissue collection, storage, processing and dissemination. Tissue Core provides investigators with access to high quality, well-annotated human specimens obtained from representative of the patient populations. The advent of powerful molecular technologies has opened the door to developing more effective treatments of patients with cancer. Access to high quality specimens with associated clinical, treatment, recurrence outcome data will be critical to developing and validating the tests needed for diagnosis and prediction of response to therapy. Since its commencement in 1993, the Tissue Core has collected more than 8,000 cases of human liquid cancers and solid primary and metastatic tumors both malignant and benign with adjacent normal, from variety of sites and diagnoses. Collected samples are mostly remnant tissues obtained from patients undergoing therapeutic surgical procedures at the Center. The core also ensures tissue release compliance with USF-IRB and Privacy Board recommendations. * Protocol driven sample collection, processing and distribution * Collection of sample and patient demographic information. * Nucleic acid extractions from tissue sections, FNA, core biopsies blood and bone marrow. * Histology services: H&E slides, staining, sectioning, paraffin blocks, OCT blocks, sample microdissection * WBC, plasma and serum isolation. * Project development and support: Facility staff provides advice and guidance to researchers.

Abbreviations: MCC TC

Resource Type: tissue bank, biomaterial supply resource, material resource

Keywords: cancer, liquid cancer, solid primary tumor, solid tumor, metastatic tumor, malignant, benign, normal, tumor, clinical data, h&e slide, stain, section, paraffin block, oct block, sample microdissection, white blood cell, plasma, serum, private (moffitt cancer center), research

Related Condition: Cancer, Normal, Malignant, Benign, Tumor

Availability: Private, (Moffitt Cancer Center)

Resource Name: Moffitt Cancer Center Tissue Core

Resource ID: SCR_004406

Alternate IDs: nlx_143721
