**Description:** DCC DIFFUSE Standards Frameworks is a browsable database with information on both standards and the organizations which sponsor them. Entries can currently be browsed either by category, alphabetically by title or by sponsoring body. Although no further work on DIFFUSE is planned, frameworks that were created remain an accessible and relevant resource. These include frameworks developed from existing publications or specifications as well as those developed specifically for the DIFFUSE project. The DCC DIFFUSE Standards Frameworks were developed in partnership with a number of organizations with the aim of presenting searchable frameworks of standards relevant to digital curation and preservation. DCC DIFFUSE Standards Frameworks provides information about sets of standards, used by specific domains, which enable curation and preservation of, and access to, data across all stages of the DCC Curation Lifecycle Model. The project maintains information about current and emerging standards and specifications which are used. Entries for individual standards and specifications include: \* Links to database entries concerning sponsoring bodies \* Links to the official documentation \* Links to additional documentation such as user guides, tutorials, implementation profiles and registers, XML DTD or Schema \* A description of the scope of the standard or specification \* A description of the development of the standard or specification \* Practical examples of the standard or specification in use Entries for sponsoring bodies include: \* Contact details \* Organizational objectives \* Areas of activity \* Membership details DCC DIFFUSE includes published standards which are included in frameworks used for curation and preservation of access to digital material, for example: \* Standards ratified by national or international standards organizations or bodies \* Standards developed by, or ratified by, professional organizations \* Publicly available specifications developed by, or ratified by, a consortia or fora
