Proper Citation: Biobank Ireland Trust (RRID:SCR_006430)

Description: Biobank Ireland Trust promotes the development of an Irish Hospital Biobank Network to coordinate collection of small samples of cancer and normal tissue and coded patient data from those having a cancer operation. This will facilitate international molecular research collaborations, which may help identify the best treatment for each individual patient - personalized medicine. Biobank Ireland is promoting the development of a Hospital Biobank Network throughout the island of Ireland as a bridge between cancer research and care. This new infrastructure will facilitate large national and international translational research collaborations that will raise Ireland's research profile and benefit those with cancer. Researchers will have online access to samples and to restricted patient data from participating hospitals and an equitable withdrawal process for scientifically and ethically approved projects. Important research results will be explained to the public. Other Objectives: * To facilitate (inter)national translational research collaborations that may lead to new tests and better, less toxic treatments for those with cancer * To enable molecular research on cancer tissue from clinical trials patients identify the best treatment for each individual patient ????????personalized medicine????????? * Researchers will have online access to samples and restricted patient data from participating hospitals, and a fair release process for scientifically and ethically approved projects * Biobank Ireland recognizes the need to have harmonization in biobanking around the world * Important research results will be explained to the public * Biobank Ireland will seek to have the hospital-based Biobank Network funded by government as standard of care

Abbreviations: Biobank Ireland

Resource Type: tissue bank, material resource, biomaterial supply resource

Keywords: tissue, cancer tissue, normal tissue, blood, clinical data, tumor, frozen, cancer, normal

Related Condition: Cancer, Normal

Funding: industry ;
business ;
philanthropists ;
fundraising events

Availability: Collaborators: This new infrastructure will facilitate large national and international translational research collaborations that will raise Ireland's research profile and benefit those with cancer. Researchers will have online access to samples and to restricted patient data from participating hospitals and an equitable withdrawal process for scientifically and ethically approved projects.
