Description: NRESTdb is an online resource which provides access to sequence, clustering, classification and annotation data of ESTs from rubber. The NRESTdb consists of EST sequences, BLASTX search results against the non-redundant protein database (NR), Pfam and InterPro, annotations based on KOG, Inparanoid and GO classifications, enhanced datasets related to rubber research topics of interest and search tools to facilitate user navigation. The NRESTdb resources and facilities are aimed at providing a genomic data resource to facilitate rubber biotechnology research. The development of NRESTdb is a collaborative project of the Malaysia Genome Institute EST database working group and the Malaysian Rubber Board genomics group.
