Proper Citation: Society for Neuroscience (RRID:SCR_008768)

Description: The Society for Neuroscience (SfN) is a nonprofit membership organization of scientists and physicians who study the brain and nervous system. Since its inception in 1969, the Society has grown from 500 members to over 40,000. Today, SfN is the world's largest organization of scientists and physicians devoted to advancing understanding of the brain and nervous system. SfN's mission is to: 1. Advance the understanding of the brain and the nervous system by bringing together scientists of diverse backgrounds, by facilitating the integration of research directed at all levels of biological organization, and by encouraging translational research and the application of new scientific knowledge to develop improved disease treatments and cures. 2. Provide professional development activities, information, and educational resources for neuroscientists at all stages of their careers, including undergraduates, graduates, and postdoctoral fellows, and increase participation of scientists from a diversity of cultural and ethnic backgrounds. 3. Promote public information and general education about the nature of scientific discovery and the results and implications of the latest neuroscience research. Support active and continuing discussions on ethical issues relating to the conduct and outcomes of neuroscience research. 4. Inform legislators and other policymakers about new scientific knowledge and recent developments in neuroscience research and their implications for public policy, societal benefit, and continued scientific progress..

Abbreviations: SfN

Synonyms: The Society for Neuroscience

Resource Type: organization portal, portal, meeting resource, data or information resource, training resource

Keywords: neuroscience

Resource Name: Society for Neuroscience

Resource ID: SCR_008768

Alternate IDs: nlx_144069

Record Creation Time: 20220129T080249+0000

Record Last Update: 20260804T043356+0000
