Proper Citation: HOL (RRID:SCR_010237)

Description: An online database mainly about the order Hymenoptera. It contains some 115,000 species and literally millions of specimens in collections around the world. Some parts of this database have extensive information available (e.g., Proctotrupoidea, Platygastroidea, Ceraphronoidea, Apoidea), even to the level of specimens (see Platygastriidae, Pelecinidae, Monomachidae, Stephanidae). These data have been gathered with the collaboration of a number of colleagues. Other taxa still need work. Hymenoptera Online (HOL) is no longer solely dedicated to Hymenoptera as recent acquisitions have expanded the taxonomic scope of this resource to include Hemiptera, Coleoptera, Mites, Fishes, and others with the help of a number of tireless collaborators. If you would like to contribute to the further development and enhancement of this resource or need technical assistance related to Hymenoptera Online services, please contact HOL Help, Norman F. Johnson, or the HOL Google+ Page. Search for taxa, collections, authors, collectors and specimens by typing your simple query in the text box below. Taxon name searches are case-sensitive and a wildcard (%) will automatically be appended to the end of your query (e.g. Telenomus); the same applies to collectors and authors (e.g. Johnson), collections (e.g. CNC), places (e.g. Bahia), journals (e.g. Memoirs), and specimen searches by specimen ID (e.g. ANIC DB 32).

Abbreviations: HOL

Synonyms: Hymenoptera Online (HOL)

Resource Type: database, data or information resource

Resource Name: HOL

Resource ID: SCR_010237
