Proper Citation: American Society for Cell Biology (RRID:SCR_010600)

Description: The American Society for Cell Biology (ASCB) was founded in 1960 to bring the varied facets of cell biology together. The Society's purpose is to promote and develop the field of cell biology. Its objectives are achieved through the scholarly dissemination of research at its Annual Meeting and Summer Meetings and in its publications. The ASCB strives to ensure the future of basic scientific research by providing training and development opportunities for students and young investigators, and also by keeping Congress and the American public informed about the importance of biological research. Since its founding, the ASCB has grown to approximately 10,000 members in the United States and more than 65 countries around the world. About 25% of ASCB members are international. Current members come from universities, colleges, professional schools, government, industry, and public and private research institutions. Membership in the ASCB is open to all research scientists, students, educators (high school, undergraduate, and graduate level), and technicians who have education or research experience in cell biology or an allied field.

Abbreviations: ASCB

Synonyms: The American Society for Cell Biology

Resource Type: narrative resource, meeting resource, data or information resource, portal, community building portal, training resource

Resource Name: American Society for Cell Biology

Resource ID: SCR_010600

Alternate IDs: nlx_50636

Record Creation Time: 20220129T080259+0000

Ratings and Alerts

No rating or validation information has been found for American Society for Cell Biology.

No alerts have been found for American Society for Cell Biology.
