### Resource Information

**URL:** <http://www.helmholtz-muenchen.de/en/ieg>

**Proper Citation:** Helmholtz Center Munich Institute of Experimental Genetics (RRID:SCR\_011286)

**Description:** The aim of the Institute of Experimental Genetics (IEG) is to further the basic understanding of mechanisms that underlie the etiology of human diseases. Metabolic diseases with focus on diabetes and bone/cartilage disorders are the new key areas of research. Experimental set-ups are centered on the mouse as pre-clinical model organism. Besides studying the effects of genotypes, the institute has recently started to identify and characterize environmental factors and the mechanisms by which these act on the etiology of diseases. The systemic phenotyping of models and the exploration of envirotypes as a source of important disease factors are integral to the German Mouse Clinic (GMC).

**Abbreviations:** IEG

**Synonyms:** Helmholtz Zentrum Munchen Institute of Experimental Genetics

**Resource Type:** institution

**Keywords:** institute, experimental genetics, human disease, diabetes, bone disorder, cartilage disorder

**Resource Name:** Helmholtz Center Munich Institute of Experimental Genetics

**Resource ID:** SCR\_011286

**Alternate IDs:** nlx\_151626

**Record Creation Time:** 20220129T080303+0000

**Record Last Update:** 20260801T190422+0000
