Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on May 2,2024. ANFF provides leading-edge research capability and supports excellence in science. The capability provided by ANFF enables users to process hard materials (metals, composites and ceramics) and soft materials (polymers and polymer-biological moieties) and transform these into structures that have application in sensors, medical devices, nanophotonics and nanoelectronics. It has a strong emphasis on service provision to the research community. ANFF seeks to enhance national and international collaborations and enable world-class-research.

Abbreviations: ANFF Photonics

Synonyms: Australian National Fabrication Facility Photonics

Resource Type: core facility, service resource, access service resource
