Proper Citation: Comstat (RRID:SCR_014566)

Description: A software that is used to analyze image stacks of biofilms that were recorded by confocal microscopes. While this program does not have any statistical calculation methods, it can extract a number of quantitative parameters from the images. This software was initially developed by Arne Heydorn and Bjarne Ersboll as a MatLab script until it was expanded into an independent software in 2008.

Resource Type: data processing software, image analysis software, software application, software resource

Keywords: image stack, biofilms, confocal microscope, image analysis, biofilm, quantitative parameter

Availability: Open Source with sign-up

Resource Name: Comstat

Resource ID: SCR_014566

License: Information on main website

License URLs: <http://www.comstat.dk/>

Record Creation Time: 20220129T080321+0000

Record Last Update: 20260919T195603+0000

Ratings and Alerts

No rating or validation information has been found for Comstat.
