Proper Citation: BoxPlotR (RRID:SCR_015629)

Description: Web tool written in R for generation of box plots with R packages shiny, beanplot4, vioplot, beeswarm and RColorBrewer, and hosted on shiny server to allow for interactive data analysis. Data are held temporarily and discarded as soon as session terminates. Represents both summary statistics and distribution of primary data. Enables visualization of minimum, lower quartile, median, upper quartile and maximum of any data set. Data matrix can be uploaded as file or pasted into application. May be downloaded to run locally or as virtual machine for VMware and VirtualBox.

Resource Type: web application, software resource, data visualization software, data processing software, software application

Defining Citation: [PMID:24481215](#)

Keywords: Box plot generation, customized box plot, data, plot, analysis
