Proper Citation: Texas University Health Science Center at San Antonio Biomolecular NMR Core Facility (RRID:SCR_017775)

Description: Core offers high field NMR instrumentation for structural studies of biological macromolecules. Instrumentation includes four-channel Bruker Avance 500, 600, and 700 MHz NMR spectrometers, ultra high sensitivity 5mm 1H-13C-15N triple-resonance cold probe for 600 MHz spectrometers. Service include acquisition and analysis of required spectra for elucidation of small molecule structures (includes synthetic molecules, natural products, cofactors, lipids, and short peptides (30 amino acids or less)). Types of projects conducted collaboratively include determination of three-dimensional structures of biological macromolecules, including proteins and nucleic acids, both alone and as complexes with various ligands.

Synonyms: Biomolecular NMR Core

Resource Type: service resource, core facility, access service resource

Keywords: Biomolecular, NMR, structural, study, macromolecule, spectrometry, acquisition, analysis, spectra, small, molecule, structure, lipid, peptide, cofactor, protein, nucleic acid, ligand, service, core
