Proper Citation: Sutter: P-2000 Laser Micropipette Puller (RRID:SCR_018640)

Description: Microprocessor controlled, CO2 laser based micropipette puller.Default configuration allows fabrication of micropipettes for intracellular recording, patch clamping, microinjection and microperfusion.Can store up to 100 separate programs, each consisting of up to 8 command lines. The five parameters set in each command line allow exquisite control of the micropipette taper geometry. Allows the use of wide range of glass diameters from 0.125 to 1.2 mm.

Resource Type: instrument resource

Keywords: Laser Micropipette Puller, Instrument, Equipment, USEDit, ABRF

Availability: Commercially available

Resource Name: Sutter: P-2000 Laser Micropipette Puller

Resource ID: SCR_018640

Alternate IDs: SCR_020537, SCR_020213, Model_Number_P2000

Alternate URLs: https://www.sutter.com/manuals/P-2000_OpMan.pdf

Record Creation Time: 20220129T080341+0000

Record Last Update: 20260805T044422+0000

Ratings and Alerts

No rating or validation information has been found for Sutter: P-2000 Laser Micropipette Puller.

No alerts have been found for Sutter: P-2000 Laser Micropipette Puller.

Data and Source Information
