Proper Citation: University of Massachusetts Medical School Viral Vector Core Facility (RRID:SCR_023497)

Description: Core uses technologies to create and produce variety of high quality viral vectors. Provides investigators with the most suitable and efficient gene transfer vectors. Vectors produced include AD, AAV, and Lenti/retro. VVC staff can assist investigators with selection of gene transfer vector, its design and potential applications. Services include AdV vector creation and production, AAV vector production, Lentiviral vector production, AAV neutralizing antibody screening and titration.
