Proper Citation: University of Pittsburgh Pitt Biospecimen Core Facility (RRID:SCR_025229)

Description: Pitt Biospecimen Core provides human sample procurement in multiple UPMC hospitals across Pittsburgh. Standard operating procedures for procurement and processing are developed for each project in partnership with each study's principal investigator. A rigorous quality assurance program ensures SOP compliance. In addition to specimen banking and pathology consultation, research histology services by expert histology specialists are also available.
