Description: Cogentech's Genomic Core Facility (GU) provides professional support for workflow of research projects, from counseling on experimental design to functional interpretation of results. Support includes identification of the most suitable methodology to achieve the experimental aim, quality control of nucleic acid, generation of indexed fragment library, sequencing according to experimental needs and bioinformatic support for selected applications. Customized protocols can be set-up as well. Sequencing data are delivered using a password protected user-friendly web interface. The laboratory is ISO9001 certified.
