Proper Citation: State University of Campinas LIAFQ-IQ Laboratory of Physicochemical Analysis Core Facility (RRID:SCR_027389)

Description: Laboratory for Physicochemical Analysis of IQ-UNICAMP houses equipment for a range of analytical techniques: Thermal Analysis comprises techniques that measure the physical or chemical properties of a substance, or its reaction products, under controlled temperature variation; Atomic Spectrometry enables multi-element determination in solution samples; Elemental Analysis is used to determine the Carbon, Hydrogen, and Nitrogen content in solid and viscous samples. Nitrogen Physisorption is a technique used to determine the surface area and pore size of solid materials.
