Description: Core provides support for research teams using non-human primate models in scientific projects. It combines specialized biomedical infrastructure, neuroscience expertise, regulatory guidance and qualified technical staff to ensure the housing, monitoring, handling and experimental use of monkeys in accordance with ethical and regulatory standards. It offers technical support for experimental procedures (A2 facility, several imaging techniques), behavioral training, and neurophysiological investigations as well as gene and cell therapy projects (in collaboration with PBI's TIDU GENOV unit).
