Description: Core is part of the University of Pittsburgh Center for Biologic Imaging. Provides expertise in the design and implementation of experiments that use microscopy techniques and image analysis, including interpretation of morphological data. Services include to prepare, store and optimally analyze tissues and cells via morphological and mRNA and protein localization techniques; provide fixed cell and tissue imaging to Hillman investigators; provide live cell, live tissue, and live animal imaging to Hillman project leaders; perform detailed electron microscopy analysis of tissue structure; provide training related to use of and access to all instrumentation; Assist with experimental design and refinement, and evaluate experimental results including developing and implementing appropriate software algorithms to provide quantitative measurements.
