Description: Caenorhabditis elegans with name pha-1(e2123) III; lite-1(ce314) X; sraEx279. from WB.

Species: Caenorhabditis elegans

Synonyms: pha-1(e2123) III; lite-1(ce314) X; sraEx279.

Notes: sraEx279 [ttx-3p::Arch::TagRFP + pBX(pha-1(+))]. Maintain at 25C. This transgenic line expresses TagRFP in AIY and has little response to blue light in the absence of ATR. In the presence of ATR the reversal rate of the animal is increased upon symmetrical stimulation, and asymmetrical stimulation causes the worm to turn in the opposite direction to which the head was bent when AIY was excited.
