VC40181

RRID:WB-STRAIN:WBStrain00039165

Type: Organism

Proper Citation

RRID:WB-STRAIN:WBStrain00039165

Organism Information

URL: <http://www.wormbase.org/db/get?name=WBStrain00039165>

Proper Citation: RRID:WB-STRAIN:WBStrain00039165

Description: Caenorhabditis elegans with name Whole-genome sequenced strain. from WB.

Species: Caenorhabditis elegans

Synonyms: Whole-genome sequenced strain.

Notes: Made_by: Vancouver KO Group|"Million Mutation Project strain. Don't bleach this strain: it does not grow well in the absence of the contaminating bacteria. This strain was isolated after EMS+ENU mutagenesis of VC2010, propagated clonally through F10 to drive mutations to homozygosity, and subjected to whole-genome sequencing. It is homozygous for a large number of mutations determined from sequence data. It may also carry large copy number variations that are not homozygous. Alleles numbered between gk100000 and gk962522 are homozygous; those numbered from gk962523 up should be assumed to be non-homozygous. A graphical representation of these large copy number differences can be seen in the Plot section for each strain on the MMP web site (URL: genome.sfu.ca/mmp/).|"Million Mutation Project strain.
