Proper Citation: Source Information Flow Toolbox (RRID:SCR_002561)

Description: A GUI-enabled EEGLAB plugin for modeling and visualizing dynamical interactions between electrophysiological signals (EEG, ECoG, MEG, etc), preferably after transforming signals into the source domain. The toolbox consists of four modules: (1) Data Preprocessing, (2) Model Fitting and Connectivity Estimation, (3) Statistical Analysis, (4) Visualization, with a fifth Group Analysis module in development. Module 2 currently includes several adaptive multivariate autoregressive modeling (AMVAR) algorithms, including segmentation AMVAR and Kalman filtering. This subsequently allows the user to validate the model and estimate (in the time-frequency domain) a wide range of multivariate Granger-causal and coherence measures published to date. Module 3 includes routines for parametric and non-parametric significance testing. Module 4 contains routines for interactive visualization of dynamical interactions across time, frequency and anatomical source location.

Abbreviations: SIFT

Resource Type: data processing software, data visualization software, image analysis software, segmentation software, software application, software resource, software toolkit

Keywords: connectivity analysis, directed transfer analysis, eeg, meg, electrocorticography, granger causality, partial directed coherence

Availability: Free, Available for download, Freely available

Resource Name: Source Information Flow Toolbox

Resource ID: SCR_002561

Alternate IDs: nlx_155967

Alternate URLs: <http://www.nitrc.org/projects/sift>

License: GNU General Public License

Record Creation Time: 20220129T080214+0000

Record Last Update: 20260905T132450+0000

Ratings and Alerts

No rating or validation information has been found for Source Information Flow Toolbox.

No alerts have been found for Source Information Flow Toolbox.
