Proper Citation: Template Image Processing Library (RRID:SCR_002600)

Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on January 14, 2026. A lightweight C++ template library designed mainly for medical imaging processing. The design paradigm follows generic programming, and the purpose is to provide an easy-to-use and also ready-to-use library. The code is template-based, and only header files are needed to be included to the source code. This library provides the following functions: # DICOM (r), Analyze(r), Nifti (r/w), and MATLAB MAT V4 (r/w) # numerical: add, multiply, gradient. # interpolation: linear, gaussian radial basis # filters: mean, gaussian, laplacian, sobel, anisotropic diffusion # morphological processing: erosion, expansion, opening, closing # template-based Fourier transform # linear coregistration: rigid body, affine transform, least square fit, mutual information # nonlinear coregistration: The Large Deformation Diffeomorphic Metric Mapping (LDDMM)

Abbreviations: TIPL

Resource Type: data processing software, image analysis software, image processing software, software application, software library, software resource, software toolkit

Keywords: reusable library, analyze, c++, dicom, format conversion, magnetic resonance, nifti, os independent, segmentation, spatial transformation, visualization, win32 (ms windows)

Availability: THIS RESOURCE IS NO LONGER IN SERVICE

Resource Name: Template Image Processing Library

Resource ID: SCR_002600

Alternate IDs: nlx_156003

Alternate URLs: <http://www.nitrc.org/projects/tipl>

Record Creation Time: 20220129T080214+0000

Record Last Update: 20260905T132450+0000

Ratings and Alerts

No rating or validation information has been found for Template Image Processing Library.

No alerts have been found for Template Image Processing Library.
