Proper Citation: mzML (RRID:SCR_003763)

Description: Markup language for encoding raw spectrometer output. From 2005-2008 there has existed two separate XML formats for encoding raw spectrometer output: mzData developed by the PSI and mzXML developed at the Seattle Proteome Center at the Institute for Systems Biology. It was recognized that the existence of two separate formats for essentially the same thing generated confusion and required extra programming effort. Therefore the PSI, with full participation by ISB, has developed a new format by taking the best aspects of each of the precursor formats to form a single one. It is intended to replace the previous two formats. This new format was originally given a working name of dataXML. The final name is mzML.

Abbreviations: mzML

Synonyms: mzML Specification

Resource Type: data or information resource, interchange format, markup language, narrative resource, standard specification

Keywords: mass spectrometry, specification

Resource Name: mzML

Resource ID: SCR_003763

Alternate IDs: nlx_158004

Record Creation Time: 20220129T080220+0000

Record Last Update: 20260905T132507+0000

Ratings and Alerts

No rating or validation information has been found for mzML.

No alerts have been found for mzML.
