Proper Citation: Pathology Informatics Curriculum Wiki (RRID:SCR_004525)

Description: The Pathology Informatics Curriculum Wiki is a public wiki based on community-based, continually updated online resources. It is about computers and information technology as tools within the field of pathology. Its content includes information management and communication (e.g. meetings on quality, electronic medical records, electronic order entry, reporting critical values, etc.) The goals of the Pathology Informatics Curriculum Wiki are four-fold: 1. To increase interest among pathology residents in pathology informatics; 2. To become a shared educational resource for pathology training programs to supplement or develop their own local curriculum in pathology informatics; 3. To increase research activities in the field; and 4. To connect pathology residents to experts in pathology informatics. We encourage contributors to (1) use the the wiki format to improve and extend this curriculum; (2) help edit and maintain the pathology informatics related pages in Wikipedia that are linked to this curriculum, and (3) create new pathology informatics pages in Wikipedia and link them to this website. In each of the lessons of the curriculum, we highlight areas where we feel that there is need for new or updated articles in Wikipedia relating to that topic.

Synonyms: Path.Informatics, Pathology Informatics Wiki

Resource Type: data or information resource, narrative resource, training resource, wiki

Defining Citation: [PMID:20805963](#)

Resource Name: Pathology Informatics Curriculum Wiki

Resource ID: SCR_004525

Alternate IDs: nlx_51469
