Proper Citation: Biobanque de Picardie (RRID:SCR_004731)

Description: A secure repository of biological samples and data dedicated for medical and research purposes. These biological samples are linked to consenting patient relative data. Biobanque de Picardie provides quality and traceability services for establishment, conservation and use of biological samples collections. It houses collections of human tissue in a variety of areas of disease. Samples are used in basic research and translational studies, physiopathology of diseases and identification of new diagnostic, and as prognostic or therapeutic biomarkers. Biobanque de Picardie also develops healthy or pathological human primary stem cell banks, such as: mesenchymal stem cells in umbilical cord (HUC-MS), primary hepatocytes (HPH), peripheral blood mononuclear cells (PBMC), and fibroblasts. Biological samples are stored at - 80 degrees C in electric freezers, at - 196 degrees C in liquid nitrogen or -130 degrees C in nitrogen vapor.

Resource Type: biomaterial supply resource, material resource, tissue bank

Keywords: tissue, stem cell, mesenchymal stem cell, fibroblast, frozen, liquid nitrogen, cryopreserved, fresh, normal control, internal medicine, pediatrics, biobank, human

Related Condition: Anti-phospholipid antibody syndrome, Ovarian cancer, Hepathocellular carcinoma, Chlamydia, Acute alcoholic hepatitis, Hepatitis B, Hepatitis C, HT 21, Celiac disease, Crohn's disease, Ulcerative colitis, Giant cell arteritis, Blood disorder, Leukemia, Mastocytosis, Lymphoma, Myeloma, Obesity, Acute Pancreatitis, Rheumatoid arthritis, Kidney transplant, Human immunodeficiency virus
