## European Nucleotide Archive (ENA)

RRID:SCR\_006515

Type: Tool

### Proper Citation

European Nucleotide Archive (ENA) (RRID:SCR\_006515)

### Resource Information

**URL:** <http://www.ebi.ac.uk/ena/>

**Proper Citation:** European Nucleotide Archive (ENA) (RRID:SCR\_006515)

**Description:** Public archive providing a comprehensive record of the world's nucleotide sequencing information, covering raw sequencing data, sequence assembly information and functional annotation. All submitted data, once public, will be exchanged with the NCBI and DDBJ as part of the INSDC data exchange agreement. The European Nucleotide Archive (ENA) captures and presents information relating to experimental workflows that are based around nucleotide sequencing. A typical workflow includes the isolation and preparation of material for sequencing, a run of a sequencing machine in which sequencing data are produced and a subsequent bioinformatic analysis pipeline. ENA records this information in a data model that covers input information (sample, experimental setup, machine configuration), output machine data (sequence traces, reads and quality scores) and interpreted information (assembly, mapping, functional annotation). Data arrive at ENA from a variety of sources including submissions of raw data, assembled sequences and annotation from small-scale sequencing efforts, data provision from the major European sequencing centers and routine and comprehensive exchange with their partners in the International Nucleotide Sequence Database Collaboration (INSDC). Provision of nucleotide sequence data to ENA or its INSDC partners has become a central and mandatory step in the dissemination of research findings to the scientific community. ENA works with publishers of scientific literature and funding bodies to ensure compliance with these principles and to provide optimal submission systems and data access tools that work seamlessly with the published literature. ENA is made up of a number of distinct databases that includes the EMBL Nucleotide Sequence Database (Embl-Bank), the newly established Sequence Read Archive (SRA) and the Trace Archive. The main tool for downloading ENA data is the ENA Browser, which is available through REST URLs for easy programmatic use. All ENA data are available through the ENA Browser. Note: EMBL Nucleotide Sequence Database (EMBL-Bank) is entirely included within this resource.

**Abbreviations:** ENA

**Synonyms:** ENA, European Nucleotide Archive

**Resource Type:** data or information resource, data repository, database, service resource, storage service resource

**Defining Citation:** [PMID:20972220](#)

**Keywords:** analysis, bioinformatics, dna, nucleotide, sequencing, web service, rna, molecular biology, nucleotide sequence, protein, gene expression, gene, genome, biochemistry, molecular structure, metabolite, protein binding, chemogenomics, gold standard

**Funding:** EMBL ;  
Wellcome Trust ;  
European Union

**Availability:** Public, The community can contribute to this resource, Acknowledgement requested

**Resource Name:** European Nucleotide Archive (ENA)

**Resource ID:** SCR\_006515

**Alternate IDs:** OMICS\_01029, r3d100010527, nif-0000-32981

**Alternate URLs:** <http://www.ebi.ac.uk/embl/>, <https://doi.org/10.17616/R3HW3J>

**Record Creation Time:** 20220129T080236+0000

**Record Last Update:** 20260905T132555+0000
