Type: Tool

Proper Citation

NeuroNetwork (RRID:SCR_006761)

Resource Information

URL: <http://theneuronetwork.com/>

Proper Citation: NeuroNetwork (RRID:SCR_006761)

Description: Professional networking site dedicated to those working, studying, or simply interested in the science of the brain. Those with personal and professional interests in neuroscience, neurology, psychology, and all related areas -- those studying neural activities in invertebrates up to the human brain, including brain-like systems and networks are welcome. The NeuroNetwork was built to allow students and researchers to find and interact with each other in a professional environment. You may create searchable profiles with your research interests; start a blog; upload poster presentations and videos; post and search job listings; form a virtual group based on your interests, geographical location, etc.; and view, post, and RSVP to upcoming meetings. And don't just create a profile for yourself -- create one for your organization, institute, society, or even your lab as well.

Abbreviations: NeuroNetwork

Synonyms: The NeuroNetwork, NeuroNetwork - a professional network dedicated to the study of the brain

Resource Type: blog, community building portal, data or information resource, job resource, narrative resource, portal, video resource
