Proper Citation: Washington State University Pullman WA. Pharmacology and Toxicology (RRID:SCR_007543)

Description: The research-oriented program in pharmacology and toxicology prepares students for careers in independent research and teaching in pharmacology, toxicology and related areas. The research interests of the faculty are very broad and active areas of research include cancer biology, pharmacogenomics, pharmacokinetics, immuno-pharmacology and -toxicology and neuroscience. The diversity in faculty research interests provides students with a solid foundation in many areas of molecular and cellular pharmacology and toxicology and gives them a wide variety of research programs from which a dissertation proposal may be selected.

The curriculum provides exposure of students to virtually all areas of current research in molecular and cellular biochemistry, immunology, molecular biology, pharmacology and toxicology and formal course requirements are flexible to tailor programs to individual needs. Our graduates have been successfully placed in careers in universities and colleges, the pharmaceutical and biotech industries, and in federal and state agencies. The program awards Ph.D. and M.S. degrees.
