Proper Citation: World Health Organization Statistical Information System (RRID:SCR_008250)

Description: WHOSIS, the WHO Statistical Information System, is an interactive database bringing together core health statistics for the 193 WHO Member States. It comprises more than 100 indicators, which can be accessed by way of a quick search, by major categories, or through user-defined tables. The data can be further filtered, tabulated, charted and downloaded. The data are also published annually in the World Health Statistics Report released in May. The WHO Statistical Information System is the guide to health and health-related epidemiological and statistical information available from the World Health Organization. Most WHO technical programs make statistical information available, and they will be linked from here. Sponsors: WHOSIS is supported by the World Health Organization. Note: The WHO Statistical Information System (WHOSIS) has been incorporated into the Global Health Observatory (GHO) to provide you with more data, more tools, more analysis and more reports.

Synonyms: WHOSIS

Resource Type: data or information resource, database

Keywords: epidemiological, health, information, public health databases, statistic, FASEB list

Resource Name: World Health Organization Statistical Information System

Resource ID: SCR_008250

Alternate IDs: nif-0000-21417

Alternate URLs: http://www3.who.int/whosis/menu.cfm

Record Creation Time: 20220129T080246+0000

Record Last Update: 20260905T133152+0000

Ratings and Alerts

No rating or validation information has been found for World Health Organization Statistical Information System.

No alerts have been found for World Health Organization Statistical Information System.
