Proper Citation: Mendelspod (RRID:SCR_009027)

Description: A collection of content, including podcasts and blogs, to advance life science research, connecting people and ideas in the life sciences. Mendelspod creates a space for probing conversations and deep insight into the topics and trends which shape the industry's future and therefore our future as a species. The podcasts are engaging, thoughtful thirty minute shows twice a week on highly relevant topics to those working around the life sciences. Their format enables them to go in depth with scientists who are leaders in their field, or CEOs of high growth companies to explore trends and the latest technologies. At Mendelspod, they offer a front row seat to the revolution going on in biology, putting a human face on some complicated, highly technical topics. Here you can tune in to hear Steve Burrill give his "state of the industry" overview, or listen to George Church talk about art and science, or find out how the latest developments in NGS are helping in the war on cancer. The blogs cover the latest trends and products, and can be entertaining. Guest bloggers featured and welcomed.
